Claims 1-44 meet the criteria set forth in PCT Article 33(2) for novelty. The prior art published before the priority date does not disclose a cleaning device for cleaning a medical instrument including: a fabric, wipe or sponge impregnated with a composition comprising at least one enzyme, a surfactant and a humectant, the humectant being provided in the device to ensure that sufficient water is absorbed in the composition to retain enzyme activity during storage and prevent dry proteases from becoming a hazard when the package is opened or used.

The claimed invention is not obvious in the light of any of the cited documents nor is it disclosed in any obvious combination of them. It is also considered that it would not be obvious to a person skilled in the art in the light of common general knowledge either by itself or in combination with any of these documents. Therefore the subject matter of claims 1-44 meets the requirements of Article 33(3) PCT with regard to inventive step.
